

# Renovating the Vineyard on Piramida Hill

The Farmland and Forest Fund of the Republic of Slovenia, together with its contracted partner, is carrying out urgent works in the vineyard on Piramida Hill: removing the existing vines, which have deteriorated and died off. For safety reasons, during this time passage along the southern path through the vineyard will not be possible.

**[!] Visitors are kindly asked to strictly follow all signs and warnings, and to use the northern path, which has been additionally arranged, for walks to the top of Piramida.**

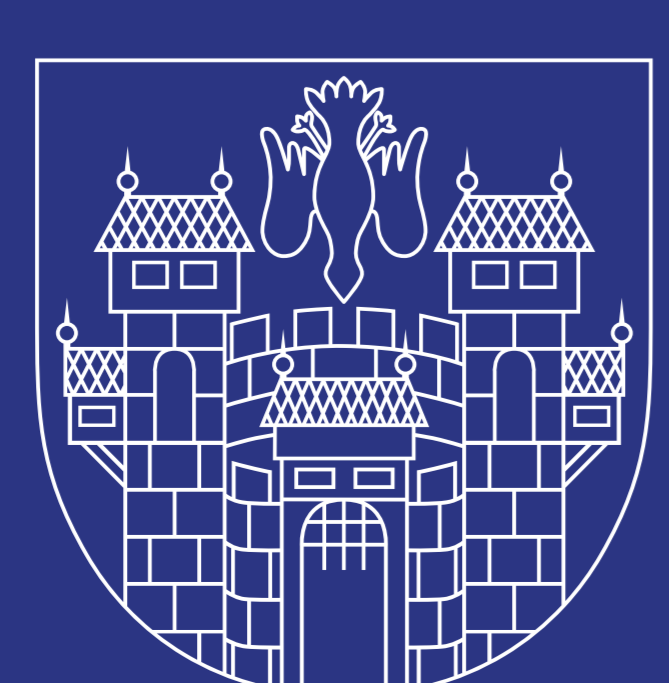

**Access to the  
Top of Piramida**

How long will this last?

The schedule depends on weather conditions, but the works are planned to continue until the end of this year. Next spring, the vineyard will be replanted in order to preserve the rich winemaking tradition on Piramida, first mentioned in a charter from 1243. At the same time, the goal is to make Piramida more than just a wine-growing hill by developing infrastructure for high-quality and active leisure time.

Partners in the renovation project: Vino Piramida, Mestne nepremičnine, City of Maribor, Farmland and Forest Fund of the RS, Agricultural and Forestry Institute Maribor, Institute for the Protection of Cultural Heritage, and Institute for Nature Conservation, Maribor Unit.
